## Wireless-AC 2400Mbps 3G/4G LTE VDSL2/ADSL2+ VPN Firewall Router

BiPAC 8900AX-2400, Wireless-AC 2400Mbps 3G/4G LTE VDSL2/ADSL2+ VPN Firewall Router, features the latest MU-MiMO with Wave2 11ac technology, supporting 4x4" Antenna with high powered WiFi. The fibre-ready triple-WAN VDSL2 router supports backward compatibility to ADSL2+. It is an innovative networking device that features concurrent dual-band 802.11ac (5GHz) wireless speeds of up to 1800Mbps and 802.11n (2.4GHz) wireless speeds of up to 600Mbps, Gigabit Ethernet, 3G/4G LTE, and NAS (Network Attached Storage) in one unit. As well as being IPv6-capable, the BiPAC 8900AX-2400 VDSL2 router supports superfast fibre connections via a Gigabit Ethernet WAN port. It also has one USB port, allowing the device to act as a print server as well as a NAS (Network Attached Storage) device with DLNA (Digital Living Network Alliance) and FTP (File Transfer Protocol) access. Moreover, the USB port can host a 3G/4G LTE modem connecting to the 3G/4G LTE network for Internet access. With an array of advanced features, the Billion BiPAC 8900AX-2400 delivers a future-proof solution for VDSL2 connections, superfast FTTC and ultra-speed FTTH (Fibre-To-The-Home) network deployment and services.

### Maximum Performance Dual-band Wi-Fi Router

Featured with the latest MU-MiMO with Wave2 11ac technology, BiPAC 8900AX-2400 supports 4x4" Antenna with high power WiFi and dual-band technology. The BiPAC 8900AX-2400 can run both 2.4GHz and 5GHz frequency bands at the same time, offer ultra-fast wireless speeds of up to 2400Mbps and multiple SSIDs. The BiPAC 8900AX-2400, by adopting this state-of-the-art technology, allows for multiple-demand applications, such as streaming HD videos and multiplayer gaming simultaneously. Wireless Protected Access (WPA-PSK/WPA2-PSK) and Wireless Encryption Protocol (WEP) features enhance the level transmission security and access control over wireless LAN. The router also supports the Wi-Fi Protected Setup (WPS) stand: allowing users to establish a secure wireless network by simply pushing a button. If your network requires wider coverage, the built-in Wireless Distribution System (WDS) repeater function allows you to expand your wireless network without the need for any external wires or cables.

### Pathway to the Future

IPv6 (Internet Protocol Version 6), launched as the current IPv4 is getting filled up, gradually becomes the indispensable addressing system for the savvy cloud computing users. Equipped with IPv6, the BiPAC 8900AX-2400 eagerly provides users a better working environment to work with, a shortcut to upgrade and a more efficient solution to save budget. For the customers during this transition period, dual stack (IPv4 and IPv6) feature enables the hosts a convenient way to reserve both address to smooth over this coexistent period.

### 3G/4G LTE Mobility and Always-On Connectivity

With the BiPAC 8900AX-2400 you can connect a 3G/4G LTE USB modem to its built-in USB port, allowing you to watch movies, download music or access e-mail no matter where you may be. You can even share your Internet connection with others, when away on business, at a show, or wherever there is mobile signal but no fixed line access. The auto fail-over feature ensures maximum connectivity and minimum interruption by quickly and smoothly connecting to a 3G/4G LTE network in the event that your DSL/fibre/cable line fails. The BiPAC 8900AX-2400 will then automatically reconnect to the DSL/fibre/cable connection when it's restored, reducing connection costs. These features are perfect for office situations where a constant and uninterrupted connection is critical.

### Experience Gigabit

The BiPAC 8900AX-2400 has four Gigabit LAN ports and one Giga Ethernet WAN port that can be configured as a WAN interface for broadband connectivity. This EWAN offers another broadband connectivity option for connecting to a cable, DSL, fibre modem. The BiPAC 8900AX-2400 again offers users convenience and optimal network performance with data rates reaching up to 1Gbps.
